1 EXECUTIVE SUMMARY

The present document provides the list of links to the videos produced during the occasion of the national Forums and produced by each national partner.

This project has received funding from the European Union's Seventh Framework Programme for research, technological development and demonstration under grant agreement no [289042].

2 INTRODUCTION

The present document provides the list of links to the videos produced during the occasion of the national Forums and produced by each national partner.

The national fora were implemented successfully between April 2014 and April 2015 in 12 European countries.

Each individual fora consisted of an expert panel providing access to the most up to date research and scientific information about marine litter. The fora provided a non-confrontational and inclusive environment for participants to discuss marine litter and its impact.

The forum structure brought together multiple individuals from different sectors to partake in debate regarding the best solutions to marine litter. Many countries also included the option for public groups that could not attend the event to attend remotely through the option of live webcasts of the fora. In total 1540 stakeholders were engaged during the forum process.

The aim of each individual fora was to promote discussion between multiple stakeholders across various sectors including industry representatives, the public, environmental concern groups, non-governmental organisations, and national/regional policy and decision makers.

In the following paragraph you will find the list of national forum, chronologically and the direct links to the national forum pages.

3 LIST OF VIDEOS

The videos about the MARLISCO Fora have been published on the national youtube channel and embedded in each national forum page on the marlisco.eu website.

In addition to the full video of the events, some NPs decided to make a short edited video of the forum for dissemination purposes.

Note that, there are two partners finalizing their video editions and national for a page – UK and Slovenia. These will be updated until 31st of May.

Country	Partner responsible	Date of National Forum	URL : All videos are available in the national fora pages, including additional information, and final reports in national languages

This project has received funding from the European Union's Seventh Framework Programme for research, technological development and demonstration under grant agreement no [289042].

4 CONCLUSION

All videos have been disseminated by the national partners. Results have indicated that the fora were viewed as a positive experience, with participants reporting a difference in their perception of marine litter. By working collectively with members of the scientific community, stakeholders, and the public the outcomes from the fora are being used to constructively address the detrimental impact of marine litter throughout Europe.

National reports are also made available from each of the partner countries and many will be made available through the MARLISCO website national fora pages.
